ABOUT HEICHE US

Heiche US is service provider for the functional surface finishing of metallic materials, which improve corrosion protection of the metals and offers excellent adhesion.

The build-up of a natural oxide layer is slowed down by the use of this extremely thin surface layer.

These layers are an outstanding basis for following processes:

- Welding
- Glue
- Paint
- Vulcanize

PROCESSES

In our location in Jasper, Alabama we're offering coatings as:

- Cleaning with silicate layers as Gardoclean 299
features: improvement adhesion (glue)
layer thickness: 2 – 7 mg/m²
corrosion protection: storage protection up to 3 months
- Titanium conversion coating with Alodine 2040 R2
(BONDERITE® M-NT 2040)
environmental aspect: Chromium(VI)-free
features: improvement of weldability and adhesion (glue and lacquers)
layer thickness: 2 – 15 mg/m²
corrosion protection: storage protection up to 3 months
